PERFIL PROFESIONAL

Software Engineer focused on designing, building, and scaling robust, high-performance web applications. Currently completing the final coursework for a Bachelor's degree in Technology Management at UADE, I combine a strong technical background with a strategic perspective. This enables me to seamlessly align complex development lifecycles and software architecture with overarching business goals and client requirements.

PROFESSIONAL EXPERIENCE

UO SOLUTIONS | Software Engineer | July 2022 – Present

- Development of scalable web applications using React, TypeScript, PHP, and WordPress, prioritizing service-oriented architecture and high performance.
- Implementation of business automation and AI integration using Node.js, Vercel, Supabase, and REST APIs, optimizing critical workflows.
- Infrastructure and DevOps management: administration of cPanel, MySQL, Git, FileZilla, and XAMPP, ensuring security, backups, and efficient deployments.
- Technical SEO and analytics strategy: implementation of Google Analytics, SEMrush, and Ahrefs for organic optimization and data dashboards.

UO SOLUTIONS | CMS Specialist | May 2022 – July 2022

- Management of technical email marketing campaigns using Adobe Experience CMS; advanced layout adjustments via HTML and CSS.
- Operation of CRM systems and technical workflows for the automation of lead integrations.

ESTUDIO MATLIN | Accounting Clerk | January 2022 – April 2022

- Management of administrative and accounting operations, financial transaction processing, and balance sheet control using Google Workspace.
